SUMMARY OF EXPERIENCE

Mr. Moran has over 28 years of diverse surveying experience. He is the founder of two surveying companies, a commercial construction company, a real estate investment company and a residential rental company. He is responsible for the technical and management aspects of planning, GPS and surveying projects within our firm. In addition to the historical duties of boundaries, other projects have included site preparation for residential and commercial construction, pipelines, roadway layout, bridge alignment and sanitary and storm sewer lines. Topographic surveys for architectural and engineering design; horizontal and vertical control surveys for aerial photogrammetry and construction sites; FEMA elevation certificates and LOMA's; underground coal and limestone surveying, underground and surface mine environmental & operational permitting, quarry permitting; gas/oil well permitting and encroachment permitting; erosion and sediment plans, minor storm water structure design; CORPS and other environmental permitting, wetlands surveys and mapping. *Years With Our Firm: 20*

MAJOR PROJECT EXPERIENCE

USDA Forest Service. *Monongahela National Forest, Elkins, WV.*

Crew leader assisting Forest Service employees in the surveying and layout for many miles of low order access roads, sanitary sewage system, pedestrian suspension bridge, layout of steel/wood walkway to scenic observation deck.
